

## Marine Backstay Antenna

**HF frequencies marine antenna**

The Bushcomm Marine Backstay Antenna is designed for use with an HF tuner and counterpoise installation.

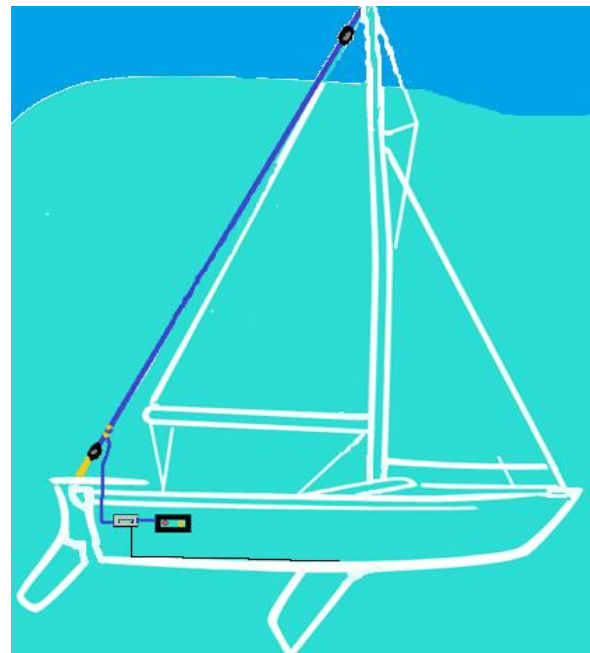

It is available in 13metre and 15 metre antenna configurations with overall lengths of approximately 13.4m and 15.4 m respectively.

They have an adjustable turnbuckle for tensioning and an insulated 4 metre lead for tuner connection. This can be shortened if necessary. The lead is terminated with an eyelet to suit a 6mm or 1/4" stud.

All metal components are made from 316 marine grade stainless steel. Wire is 2mm diameter.

The ends of the antenna are fitted with insulators and stainless steel cables, fitted with a thimble on one end and a 4 hole eye plate on the other.

**BU01027 13 metre version**  
**BU01029 15 metre version**

### SPECIAL FEATURES
