

MIL-5

Tactical Emergency Long Wire Antenna #BU00183

Two Models Available:

BU00183 - Suits Barrett 2090 Manpack

BU00183C - Suits Codan 2110/2110V Manpack

Description

The Tactical Emergency Long Wire Antenna is a 10m Kevlar reinforced radiating wire, with a 10m weighted length of cord attached, to ease throwing over a suitable raised feature (e.g. tree). The antenna is not tuned or optimised for performance, but is rather designed to be light weight and convenient to carry.

P/N #BU00183

Contents Overview

- Non reflective threaded connector with copper contact and added insulation and strain relief.
- 10m Kevlar antenna wire
- Insulator
- 10m throw cord
- Lead-free throw weight (~30g)
- Winder with handle
- 300mm Velcro closure

Notes

- The throw cord is fixed to the Kevlar wire via an insulator. The throw cord is tied to the throw weight.
- The Kevlar wire is a copper braid with a Kevlar fibre core in the centre and a military green PVC insulating sheath on the outer.

Power: No limitation.

Packed Dimensions: 170x65x55mm

Weight: 262gm
