

BBA - 100CE HF ANTENNA **DR** DIGITAL HF VOICE & DATA RADIO COMPATIBLE

HF BROADBAND MULTIWIRE DIPOLE
Extended Low Frequency

Our flagship model and all-round best performer to date is the BBA series of antennas.

These antennas are highly efficient, and engineered to meet the exacting standards of professional users. Frequency range is specified according to useful gain (not only VSWR). All components are validated for rated power.

The Bushcomm BBA has the flexibility to suit a wide range of applications. It can be installed horizontally between two purpose built towers, or alternatively in an inverted "V" configuration for improved NVIS propagation characteristics.

Light yet sturdy construction ensures low total mass wind loading. The highest quality materials are used in construction, such as stainless steel wire and fittings, and UV resistant fibreglass rods, to produce an antenna that will survive the rigours of the outdoors for many years.

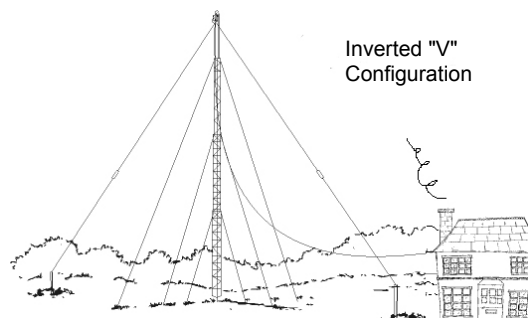

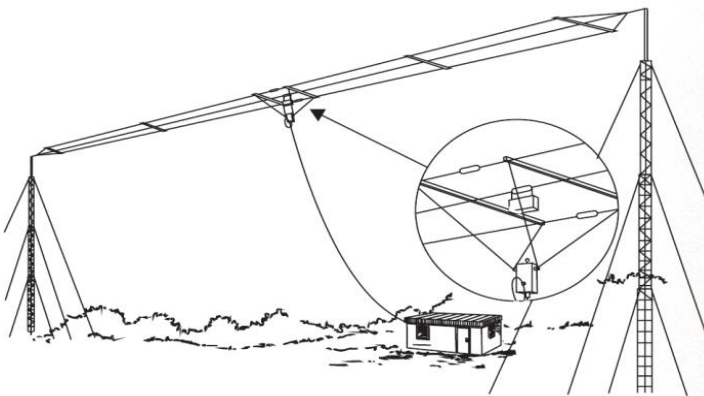

There are many variants in the BBA family with sizes and power ratings to suit a wide range of applications.
