

# MIL-1 Portable Light Weight

## Tactical HF Broadband Antenna #BU00137

The Bushcomm Tactical MIL-1 antenna has been designed specifically for military use. All metallic parts are blackened.

This portable light weight antenna only weighs 1070 grams. It is constructed using a Kevlar cored, PVC covered, copper braid cable, which can be efficiently wound around the moulded winder-style balun.

It comes in a handy and durable bag and is supplied with a 5m RG58 cable fitted with a UHF Male RF connector, tie cords and a blackened s/steel earth stake. This end fed antenna is a true wideband/broadband system covering frequencies of 3.0 - 30 MHz *without the need of an antenna tuner*. All that is required to start transmitting is a radio.

### SPECIFICATION

#### MECHANICAL

Material	Kevlar cored, PVC covered, copper braid cable, Moulded Balun/winder Black Carry Satchel
Weight	1070g
Overall Length	28 metres

#### ELECTRICAL

Impedance	50 Ohm
Frequency	3.0MHz - 30MHz
Power Rating	125W PEP (voice), 30W (data)

#### SPECIAL FEATURES.

- ★ Light weight and extremely portable
- ★ Easy to setup, ready to go in minutes (only requires one person)
- ★ Water proof moulded winder/balun and load
- ★ Weighs in at a mere 1070g
